

# INTRODUCING VOD NAVIGATOR

Veno-occlusive disease (VOD), or sinusoidal obstruction syndrome (SOS), is a rare condition that can be challenging to assess. VOD Navigator can help.

- A one-stop shop for information related to risk factors, diagnosis, and severity grading of VOD for both adult and pediatric patients
- Developed in consultation with stem cell transplant healthcare practitioners

Provides an **overview of risk factors** and **published criteria** for diagnosis and severity grading of the disease

Offers a **built-in assessment tool** to help evaluate your specific patients based on these criteria

Allows you to **email results** to yourself so that they can be added to the patient file

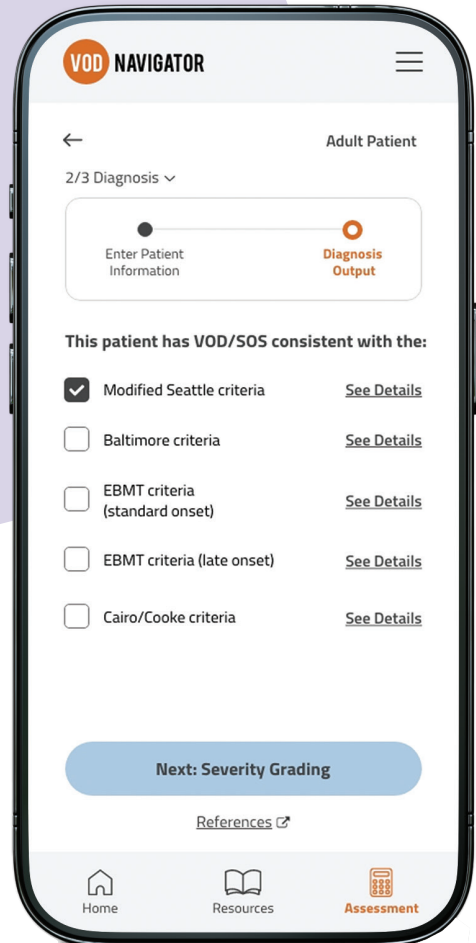

## ACCESS ON YOUR PHONE, COMPUTER, OR TABLET

- ✓ Interactive
- ✓ Comprehensive
- ✓ Free to use
